Summary

Senior Platform Engineer with 10+ years of experience designing, building and operating cloud and Kubernetes platforms. Strong expertise in Kubernetes, Google Cloud Platform (GCP), Terraform, Config Connector, GitOps and Argo CD, with a focus on infrastructure automation, platform reliability and scalable cloud architectures.

Technical Skills

Cloud & Platform: Google Cloud Platform, GKE, Cloud Run, Cloud Functions, IAM, Workload Identity, Shared VPC, Private Service Connect, Cloud DNS, Cloud Storage, Firewall, Secure Web Proxy, PSA, Cloud SQL, Database Migration Service, Artifact Registry

Kubernetes & Containers: Kubernetes, GKE, Docker, Helm, Envoy Gateway, Velero, Kubed, Dex

Infrastructure as Code & GitOps: Terraform, Argo CD, GitOps, Config Connector, Crossplane, Ansible

CI/CD & Software Factory: GitLab, GitLab CI, GitLab Runner, GRIT, Jenkins, Artifactory, SonarQube

Observability & Security: Prometheus, Grafana, Alertmanager, Dynatrace, cert-manager, External Secrets, Vault

Automation: Python, Bash, Go

Experience

Renault Group

Dec 2018 – Present

Three consecutive roles within the same Cloud & Platform organization, evolving from cloud migration to Kubernetes platform engineering and Software Factory platform ownership.

Software Factory Platform Engineer

Nov 2024 – Present

Renault Group – Cloud & Platform organization, Paris

- Own and evolve Renault Group's Software Factory platform, including GitLab, Artifactory and SonarQube.
- Led the migration of GitLab from AWS to Google Cloud Platform.
- Design Private Service Connect architectures for secure cross-project service connectivity on GCP.
- Build Cloud Run and Cloud Functions automation to streamline platform operations.
- Drove continuous platform modernization by migrating GCP resource management from Terraform to Config Connector and transitioning the Software Factory ingress from NGINX Ingress Controller to Envoy Gateway ahead of end of support.

Technologies: GitLab, GitLab Runner, GCP, AWS, Artifactory, SonarQube, Terraform, Ansible, Private Service Connect (PSC), Cloud Run, Cloud Functions, Config Connector, Kubernetes, Docker, Helm, Envoy Gateway, Python, Go

Kubernetes Platform Engineer

Jan 2022 – Oct 2024

Renault Group – Cloud & Platform organization, Paris

- Designed, built and operated Renault's shared Kubernetes platform on GKE, serving product and development teams across the organization.
- Automated GKE cluster and platform provisioning using Terraform and Config Connector, with Argo CD for GitOps-based delivery.
- Provided and maintained reusable platform capabilities for observability, security, secrets management, networking, backup and application delivery.
- Maintained and evolved the Helm charts used to deploy and manage the core Kubernetes platform components in a standardized way.

- Supported development teams by enabling the tools, services and Kubernetes capabilities required to run their workloads on the platform.

Technologies: Kubernetes, GKE, GCP, Docker, Helm, Terraform, Argo CD, GitOps, Config Connector, Prometheus, Grafana, Alertmanager, cert-manager, External Secrets, Crossplane, Dex, Dynatrace, Envoy Gateway, Velero, Python

Cloud Migration Engineer

Dec 2018 – Dec 2021

Renault Group – Cloud Transformation program, Paris

- Migrated 1,000+ applications from on-premises environments to GCP and GKE as part of Renault's cloud transformation.
- Industrialized application migrations through automated infrastructure provisioning and delivery using Terraform, GitLab CI, Docker and Helm.
- Supported application teams in containerizing and re-architecting workloads according to cloud-native principles.
- Contributed to production-ready, multi-tenant Kubernetes architectures supporting migrated workloads.

Technologies: GCP, GKE, Docker, Helm, Kubernetes, Terraform, GitLab CI, Argo CD, Bash, Python, Vault

Continuous Integration Expert

Feb 2018 – Dec 2018

Ingenico Group

- Built a CI pipeline (Jenkins, Nexus, Docker, Vagrant, Maven/Gradle) for embedded payment-terminal software.
- Automated migration of Java, Python and C projects to Bitbucket.
- Moved the Ingenico Build System from Vagrant to Docker.

Technologies: Jenkins, Nexus, Docker, Vagrant, Maven, Gradle, Java, Python, C, Bitbucket

DevOps Engineer

Dec 2017 – Jan 2018

Paris-Dauphine University

- Automated deployment of the Dauphine EBX solution with shell scripts and a versioned Docker image.
- Wrote an Ansible playbook to install and configure Oracle DB on Red Hat.

Technologies: Shell, Docker, Ansible, Oracle DB, Red Hat

Systems & Integration Engineer

Apr 2016 – Nov 2017

Sofrecom Tunisia

- Administered Orange Infra Red Hat platforms and led the 2017 roadmap delivery.
- Ran on-site workshops and acceptance tests with Orange subsidiaries.

Technologies: Red Hat, Linux, Docker, Shell

Education

Engineering Degree — Computer Networks and Telecommunications

2010 – 2015

National Institute of Applied Science and Technology (INSAT), Tunis, Tunisia

Certifications

- Certified Kubernetes Administrator (CKA), 2019
- Certified Kubernetes Application Developer (CKAD), 2020
- LFS158x – Introduction to Kubernetes, edX, 2017
- Red Hat Certified System Administrator (RHCSA), 2016
- LPIC-2 – Linux Professional Institute Certification, 2016
- LPIC-1 – Linux Professional Institute Certification, 2013

Languages

French (Fluent) • English (Professional working proficiency) • Arabic (Native)
